| 1 | pages | | | | | |
| | the sequ | ence listing part of the description: | | | | |
| | pages | ence listing part of the description:, as originally filed, filed with the demand | | | | |
| | pages | | | | | |
| 1 | pages | , filed with the letter of | | | | |
| 2. W | e internati | to the language, all the elements marked above were available or furnished to this Authority in the language in which onal application was filed, unless otherwise indicated under this item. which is: anguage of a translation furnished for the purposes of international search (under Rule 23.1(b)). | | | | |
| | the l | anguage of a translation furnished for the purposes of international configuration (under Rule 48.3(b)). | | | | |
| | the l | anguage of publication of the international application (under Rule 48.3(b)). anguage of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/ | | | | |
| L | 5 | F 2\ | | | | |
| 3. \ | | rd to any nucleotide and/or amino acid sequence disclosed in the international application, the international y examination was carried out on the basis of the sequence listing: | | | | |
| 1 1 | | tained in the international application in written form. | | | | |
| 1 1 | | d together with the international application in computer readable form. | | | | |
| 1 1 | | hished subsequently to this Authority in written form. | | | | |
| | | d Analia Authority in computer readable form. | | | | |
| | The | e statement that the subsequently furnished written sequence listing does not go beyond me discussion in the subsequently furnished | | | | |
| | Th | ernational application as filed has been furnished. e statement that the information recorded in computer readable form is identical to the written sequence listing has en furnished. | | | | |
| | П ть | e amendments have resulted in the cancellation of: | | | | |
| 4. | ' ' ' | the description, pages | | | | |
| | - | the claims, Nos | | | | |
| | <u> </u> | the drawings, sheets/fig | | | | |
| 5. | Th | is report has been established as if (some of) the amendments had not been made, since they have been considered to go yound the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).** | | | | |
| | Replacer in this 1 | nent sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to eport as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 | | | | |
| * | | 7). Accement sheet containing such amendments must be referred to under item 1 and annexed to this report. | | | | |
| 1 | | | | | | |

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP 03/11383

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

| 1. Statement | | | |
|-------------------------------|--------|------------|-----|
| Novelty (N) | Claims | 1-4, 6,7,8 | YES |
| | Claims | 5 | NO |
| Inventive step (IS) | Claims | 1~4,7 | YES |
| | Claims | 5,6,8 | NO |
| Industrial applicability (IA) | Claims | 1-8 | YES |
| | Claims | | NO |

2. Citations and explanations

1. Reference is made to the following documents:

D1: EP-A-645419
D3: FR-A-1277617
D4: BE-A-561346

- 2. The following observations are made with regard to the requirements of PCT Article 6.
- 2.1 In the opinion of the examiner section, the size or shape of the pellets is a feature of the raw material of the plastics moulding in claim 1 and not a feature of the plastics moulding in claim 1. The dimensions of the plastics moulding in claim 1 are dependent on the fusion and sintering processes. What is evidently intended here is an indication of the value of the maximum distance between unsintered surface and agglomerated pellets. In formal terms, the subject matter of claim 1 lacks clarity.
- 2.2 In the opinion of the examiner section, where heating step (b) takes place in a mould, certain conditions apparently have to be met in order to

achieve fusion of the pellet surfaces owing to the different positions of the pellets in the mould and the uniform heat penetration depth. The subject matter of claim 5 is therefore not absolutely clear (see also PCT International Search and Preliminary Examination Guidelines, paragraph 5.35).

- 2.3 Method claim 5 contains no method features designed to achieve an apparent density as per DIN ISO 60 in the range 150 to 250 g/l, as defined in independent claim 1. A person skilled in the art is therefore unable to determine the technical method conditions required to achieve the desired result. The subject matter of claim 5 therefore lacks clarity (cf. PCT International Search and Preliminary Examination Guidelines, paragraph 5.35).
- 2.4 Furthermore, the physical entity in claim 8 cannot be made by the method defined in claim 5 without further measures (cf. PCT International Search and Preliminary Examination Guidelines, paragraph 5.15).
- 2.5 Claims 1 and 8 have been drafted as separate, independent claims in the same category. According to the PCT International Search and Preliminary Examination Guidelines, paragraph 5.15, the independent claims are to include all the essential features of an invention. This requirement is not satisfied in the present case, cf. PCT Article 6 in conjunction with PCT Rule 6.4.
- 3. The following statements are made, still with reference to point 2 above.

PCT/EP 03/11383

into a mould, the size of the pellets being in the range 2 to 10 mm,

- (b) heating the plastics pellets to a temperature at which the plastics pellets begin to melt only on the surface but do not melt right through,
- (c) cooling to room temperature and
- (d) releasing the sintered plastics moulding from the mould.

The subject matter of claim 5 does not therefore satisfy the requirement of PCT Article 33(2).

Although D1 suggests that the plastics mouldings can 3.3 be used as filter material (cf. page 5, lines 24 to 28), a use of plastics mouldings as defined in claim 1 is not disclosed.

> The subject matter therefore appears to satisfy the criteria of PCT Article 33(2) and (3).

- Quenching as stated in claim 6 is not known from D1, 4.1 D3 or D4. The examiner section cannot identify a problem of interest.
- Regarding claim 8, reference is made to point 2. 4.2
- Claims 1 to 8 satisfy the criterion of PCT 5. Article 33(4).
- Contrary to the requirements of PCT Rule 5.1(a)(ii) 6.1 D1 has not been acknowledged in the description.
